

Independence Power & Light

Residential Heat Pump Rebate Application

Independence Power & Light offers rebates for new residential all-electric heat pumps and heat pumps with fossil fuel back up.

ARI Standard SEER Rating 14.0 or Higher and HSPF Seasonal Heating Efficiency of 7.0 and Higher
IPL uses SEER and HSPF ratings as shown in the ARI Directory for model numbers listed on the proof of purchase.

ARI Standard Rated in BTU/hr Cooling Capacity

	18,100 to 23,900	24,000 to 30,000	30,100 to 36,000	36,100 to 42,000	42,100 to 48,000	48,100 and higher
HPF-5 Dual Fuel Heat Pump	\$255	\$327	\$399	\$472	\$544	\$598
HPE-5 All-Electric Heat Pump	\$298	\$383	\$468	\$553	\$638	\$698

Effective for equipment installed on or after January 1, 2006

Rebate Requirements

- Unit includes a **new** outdoor heat pump and new indoor matched coil.
- Unit is installed in a single family residence.
- Electric service to the residence is provided by Independence Power & Light.
- Installed equipment must have a SEER rating of 14.0 or higher and a HSPF of 7.0 or higher.
- IPL must receive all information requested on the application form including proof of purchase for the unit. The proof of purchase must list the model numbers for the heat pump, the indoor fan coil unit and any additional installed equipment.
- The rebate application form and proof of purchase must be submitted to IPL within one year of equipment installation.
